

PARADOR

Modular ONE

Modular ONE is extremely quiet, contains no plasticisers and is produced in an ecologically ground-breaking way. Modular ONE and Modular ONE Hydron are developments from the Parador stable, which break the boundaries in the design of interior spaces.

These highest demands are more than met by Modular ONE. Optically outstanding and inimitable in terms of feel, the highly innovative design flooring stands up to the stresses and strains of life – in every room.

When it comes to technical properties, decor authenticity, and healthy indoor living, Parador floors satisfy the highest demands.

The background of the top half of the page features several thick, flowing, golden-yellow ribbons that curve and swirl against a dark, almost black background. The ribbons have a smooth, glossy texture and create a sense of dynamic movement and elegance.

livings

Living performance
is the core of the Parador brand.
For us, living means appreciating
beauty. Performance is precisely that.
Parador combines both at the highest
level – and prepares the ground for
individual living spaces.

The background of the bottom half of the page shows a dynamic splash of water. The water is captured in mid-air, creating a dense spray of white droplets and foam against a dark background. The movement is energetic and powerful, contrasting with the smooth lines of the top half.

performance

**Art of living
meets performance**

The world is changing. Increasingly complex challenges and multi-faceted impressions create surprising movements, ultimately fashioning a new dimension to the value of home living.

People who deal with forms of individual living and identify with their home in a new way turn into communities, who take care with their home surroundings.

The criteria by which the quality of life and living are re-evaluated are changing. Parador products make a sustainable contribution in this regard.

In them, beauty, design and technology, worth and longevity are combined to form a perceptible and emotional basis that withstands the demands of everyday life.

In this respect, our aim is to earn the trust of our customers for everything that we do – with clear values and a clear attitude: we are genuine, innovative and ambitious. We are proud of combining valuable home living with artistic life through what we do.

Living performance.

1. Our attitude is a clear compass that points to the future.
2. Inspirations from art, architecture and society give our products character and personality.
3. Highest standards and “German Engineered Quality” set us apart.
4. An innovative spirit and excellent technology lead to results and awards recognised worldwide.
5. Our floors promote healthy living, are low on emissions and create a pleasant living environment.
6. Sustainability is our foundation and goes hand in hand with our responsibility to preserve nature for the next generations.

Innovation hub and material workshop, trendsetter and design leader: Parador is as versatile as the products for which the company stands.

On the following pages we show what makes our wide offer so special: a declaration of love to the possibilities of customised room interior design with Modular ONE by Parador.

Nothing fascinates us as much as nature. With Modular ONE we have developed a floor that even exceeds natural materials such as wood and stone in terms of look, feel and function. And as fine as the textures on the surface are: due to its product structure, Modular ONE is an absolute all-rounder – also in the waterproof version, Modular ONE Hydron, for really every room.

There are things that you see falling, but no noise disturbs your sense of well-being. That is not just down to their lightness, but also to the outstanding flooring, Modular ONE: due to its football sound insulation, its resilient surface and material that is warm underfoot, it turns any place into a cosy home.

“Water is a friendly element and one that is necessary for life. How to deal with water needs to be carefully considered when it comes to buildings and home living – for a safe and pleasant home.”

a, b Nature is fascinating due to its perfection in form and refinement. It is our role model when it comes to developing innovative flooring that far exceeds the original in terms of feel and function.

c For many people, our environment embodies a moment of perfection.

For flooring, however, it is a challenge. Modular ONE accepts this challenge: here water behaves gently and forgivingly.

d, e We at Parador excite with flair and a pioneering spirit. In this way floors are created that bring design and function to **gether perfectly** – and withstand the stresses and strains of life.

A particular challenge: developing floors that even withstand the effects of water. Modular ONE Hydron accepts this challenge. Modular ONE Hydron is not only a high-performance and advanced multi-layer floor in authentic and contemporary designs. Waterproof and therefore also ideally suitable for wet rooms, it withstands all the demands of everyday life – and at the same time is extremely durable, healthy in the home and easy to maintain.

As a leading brand manufacturer in the premium segment, we meet our high corporate values regarding production methods, materials and environmental management. Because this is the only way that we can offer products that go far beyond the statutory provisions in terms of quality and function. Like Modular ONE, which is impressive as a plasticiser-free flooring low in emissions. Various certifications and awards such as the Blue Angel are testament to our stance and our actions.

Modular ONE
Oak, Linea natural
4-sided bevel

Wood looks not only bring warmth and cosiness to contemporary interior spaces, but also dynamism, thus creating balanced interior designs full of individuality and character – including an incomparable walking sensation.

It is authentic like wood and other role models from nature – and yet withstands the highest demands of everyday life: as a future-proof, multi-layered floor, Modular ONE redefines contemporary home living.

With its astonishingly real-looking designs, the resilient flooring enables matching decors for different room situations – also in the waterproof Modular ONE Hydron collection.

Durable, healthy in the home and easy to maintain, not only does Modular ONE withstand the demands of life, it also enriches it – for living and life at the highest level.

1730774

Modular ONE
Pino rustic-grey
4-sided bevel

Modular ONE inspires ambitious designers of interior spaces: the flooring stands for living comfort, versatility and healthy living.

Sturdy surfaces full of character and a unique combination of look and feel are what characterise Modular ONE.

Modular ONE breaks the boundaries of living room design: the Modular ONE and Modular ONE Hydron collections are durable and easy to maintain: "made in Germany" for demanding people.

Modular ONE stands for extremely authentic surfaces – and for floors whose resilient surface and integrated cork backing ensure optimal room acoustics, warm walking comfort underfoot and personal well-being in your own four walls. Produced without any plasticisers, Modular ONE meets the highest quality standards – ground-breaking and healthy in the home.
Page 26

Modular ONE Hydron is equipped with a special core board and acoustic backing and is watertproof. Modular ONE Hydron, thanks to its low installation height, is also particularly renovation-friendly. You can find a selection of the designs from the Modular ONE collection in that of Modular ONE Hydron rooms, meaning that various rooms with different requirements can be uniformly designed.
Page 40

Edition combines exclusive special collections – shaped by international trends and cultural influences. Created by Parador itself and working together with renowned designers, the floors stand for unique design quality alongside the highest functionality.
parador.de/en/design-collection

 **Iconics** Our passion lifts the work on the product from rationality to the level of sensuality. In the product world, uniqueness is increasingly important: products with soul. We take this conviction into account with our new "Iconics" products. They are modern signs with iconographic potential – bold, extraordinary and at the same time relevant to the design of beautiful spaces with a special character.

 Modular ONE
Cross Cut black
 4-sided bevel

Strength and beauty even under the highest stresses: Modular ONE Cross Cut black is an exciting invitation to contemporary living and a bow to the classic elegance that was once reserved for museums or lofts. *More on Page 31.*

With the expertise and fine craftsmanship gained from over 40 years of flooring design, at Parador we have developed a *resilient design floor*, which scores points on four levels: **Modular ONE** is healthy in the home, authentic, quiet and water-resistant.

Besides it inimitably real-looking appearance and feel qualities, Modular ONE impresses as an extremely quiet floor. Modular ONE, that is “made in Germany” – ground-breaking and in perfect form.

Synchronous texture

Synchronous textures made by Parador have a particularly natural quality. The textures are precisely matched to the representation of the decor image and imitate, for example, knots in the timber or fine cracks in a vibrant manner. Different depths determine the diversity and give the flooring a particularly authentic appearance.

**With synchronous texture for an authentic look and feel.

Parador Iconics

31

"Urban life in the style of new classics."

Factories and museums have long known the classic elegance and strength of old cross-cut timber floors. As a cultural mediator between the ages, they show the dynamic beauty of a natural ring pattern deposited over time in the

context of the highest demands. The new Modular ONE Cross Cut original and Modular ONE Cross Cut black are the exciting invitations to an urban life in the style of new classics.

**With synchronous texture for an authentic look and feel – more about this on Page 29.

“Sustainable use of materials and upcycling: inspiration for a floor that bears the aura of the unusual in it.”

What used to be seen as base boards for paintwork and was used in studios can be turned into sophisticated new flooring through upcycling. This idea for the sustainable use of materials that keep valuable resources in the cycle for as long as possible is revealed in the design of our

Modular ONE Studio grey Iconics floor. The colour of the floor seems to emerge by chance from use and history; the flooring give apartments an aura of the unusual, as can otherwise be found in galleries and exhibitions.

*please take note of installation instructions

Parador **Modular ONE** is characterised by a functional structure and intelligent technology. In this way our patented click connections guarantee a straightforward installation.

Its structure gives the flooring a particular elasticity that is kind on the joints and supports low-noise room acoustics.

Modular ONE

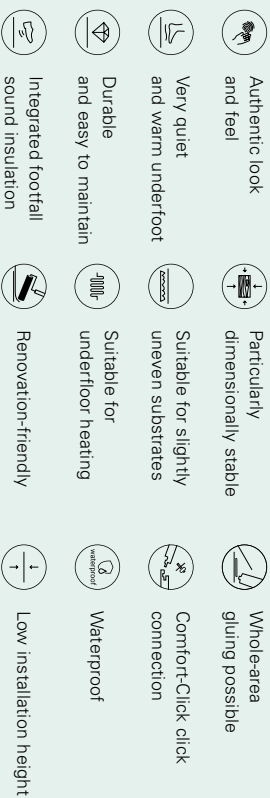

Modular ONE, that is pioneering quality – healthy in the home and plasticiser-free, in an absolutely authentic look and feel, with a resilient surface and integrated cork backing for quiet living comfort and a particularly pleasant walking sensation as well as being suitable for wet rooms.

- 1 High quality, highly abrasion-resistant polypropylene decor surface
- 2 Dimensionally stable special core board suitable for use in wet rooms
- 3 Cork acoustic backing
- 4 Safe-Lock® PRO click connection

Modular ONE Hydron

54

Modular ONE Hydron is, due to its waterproof components – from the decor surface and the core board to the backing – ideally suited for use in bathrooms. Its low installation height makes the flooring a renovation wonder – for the joy of flooring from head to toe, from the start.

- 1 High quality, highly abrasion-resistant polypropylene decor surface
- 2 Waterproof, dimensionally stable polymer core board
- 3 Polymer acoustic backing
- 4 Comfort-Click click connection

55

Experience genuine beauty with all the senses: discover the interplay of surfaces and textures on all Modular ONE products.

Surface textures

In conjunction with the extra-matt surface, the Modular ONE surface textures do justice to its special authenticity in terms of look and feel. In case of all textures, Modular ONE feels like the natural or near-natural origin on which the decor was based.

Authentic

Wood

Real

Stone / Petres

Synchronous pore

In the case of **synchronous pore**, the embossing follows the decor grain precisely. The result is a look that can hardly be distinguished from real wood.

Bevel design

4-sided bevel

By emphasising the individual planks, the all-round bevelled long and end edges create an installation pattern with the charm of a genuine floorboard or tiled floor.

Find out more at parador.de/en/your-floor/product-knowledge/modular-one

Service with system: A perfect overall impression is down to the detail. That is why Parador provides exactly matching accessories for installation and care – for the joy of flooring. From the start.

Valuable information about accessories at parador.de/en/your-floor/how-to

Underlays

Parador floors can be optimally installed for any application: our underlays even out small bumps and at the same time provide high compressive strength. With an integrated moisture barrier, the right product ensures the necessary moisture protection in case of mineral substrates.
parador.de/en/services/faq/underlays

Tools

Parador floors can be easily installed with few additional tools: parador.de/en/your-floor/product-knowledge/modular-one

Skirting boards

Parador offers a wide range of optically matching skirtings for a harmonious look to any product. Alternatively, the colours stainless steel, white and black or a primed surface for customised painting, give the opportunity to deliberately accentuate. Parador skirtings impress due to their easy fitting with clip technology (optional adhesive in adhesive groove). Our choice of caps rounds the range off. Simply perfect! parador.de/en/skirtings-accessories

Profiles

Parador profiles combine, bridge and create finishes for perfect flooring aesthetics. As transition profiles, they connect floor coverings of the same height and expansion joints. Adapting profiles are used for the transition between different height floor coverings. End profiles create clean borders with tiles, door sills and French windows. Perfect flooring harmony is achieved with the transition and adapting profile

that is identical to the flooring in terms of decor and texture.

parador.de/en/your-floor/product-knowledge/skirtings-and-profiles

 You can find helpful tips about straightforward installation of Parador Modular ONE here: parador.de/en/services/faq

Cleaning and maintenance

When it comes to cleaning and maintenance, our accessories continue the high quality line of all Parador floors down to the last detail: Parador care accessories ensure a particularly long life cycle. parador.de/en/your-floor/product-knowledge

Repair

With the Parador premium repair set, minor damage is soon rectified – because taking joy in our products for a long time is close to our hearts, even if some slight damage to the flooring is incurred from time to time. parador.de/en/your-floor/product-knowledge

Setting standards. Taking responsibility.

We act sustainably, take responsibility for the future and are committed to bringing the environment, social issues and responsible business practices in perfect balance.

When it comes to manufacturing products that are healthy in the home, we use tested raw materials. During the manufacture of all Parador products, besides wood we use other high quality, recyclable and environmentally -friendly materials from monitored sources: engineered wood flooring is, of course, produced by us using timber from sustainably managed forests.

We are continuously certified by independent institutions. Production, materials and products from Parador go beyond statutory requirements when it comes to meeting the value standards of a brand with responsibility. We are the first and only flooring manufacturer in Germany to be EMAS-certified since 2015. EMAS is the most demanding system worldwide for environmental management.

We are committed to our particular responsibility for the environment. Wood is sustainable and actively contributes to climate protection. Once installed, all Parador products are characterised by a long life cycle. Where we can, we use materials that can be easily reused in terms of energy and material.

Plant-for-the-Planet. Since 2011 Parador has been a partner of the "Plant-for-the-Planet" foundation, which campaigns worldwide for reforestation and climate justice. We support the initiative with tree-planting campaigns, as a result of which almost 200,000 trees have been planted by Parador alone.

Der Blaue Engel (The Blue Angel)
"Der Blaue Engel" certifies Parador products as low in emissions based on the current award principles.

EPD
An EPD (Environmental Product Declaration) is based on ISO 14025, the core element of which is the ecological assessment, in which the entire life cycle of a product is assessed.

FloorScore®
FloorScore® is one of the best-known American certification programs that certifies floor coverings and related products for compliance with indoor air emissions.

Emissions dans l'air intérieur (Klasse A+)
This national classification valid in France indicates the quality of indoor air.

TÜV Rheinland
The TÜV test mark confirms independent monitoring of the quality, production and functionality of Parador products.

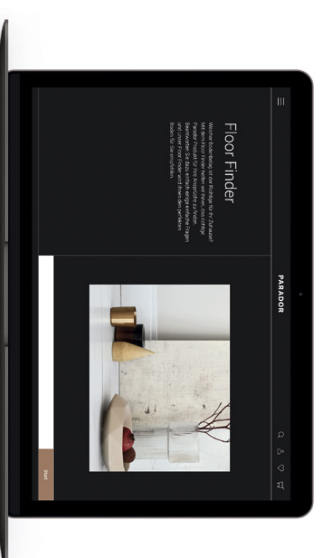

PEFC™
This trademark is awarded to products that meet the requirements of the certification system for the documentation and improvement of sustainable forest management with regard to economic, ecological and social standards.
